

International/Auberry Turnabout

It has been our hope that the Northwest Urban Plan would hear the requests of the residents on International as well as Minnewawa and create a plan that would value the rural residential lifestyle, find a way to put "rural residential" **IN** the plan and divert the traffic away from those areas.

In the latest "preferred" plan, not only is the traffic coming from Willow International not diverted, but this plan now creates a major thoroughfare from Auberry south, through half of one property and taking a large portion of the front of all properties on International making it the main connection to downtown Clovis. We wonder if you might be able to come up with an alternate plan, that might use some of the existing open space to create acceptable traffic patterns and still preserve our rural residential neighborhood.
