

Looking For a Few Good Men and Women!

Let's beautify Clovis and make a name for ourselves at the same time!

We are gathering a group of seniors who are willing to help with landscaping and beautification projects at the Clovis Senior Center, the Clovis Civic Center complex, parks and other areas of our community. We would work only a couple hours per week and are very flexible on working with various schedules and other commitments. The City of Clovis Parks Department will supply us with tools, supplies and training needed to spruce up flower beds, remove weeds, and improve community areas. The economic downturn led to a reduction in funding for parks, trails and facilities landscaping. We all want to be proud of our City and well maintained public areas help portray a good image of the city we love.

If you are interested and physically able to help, please contact Forest Risch at 299-9063. (If he is not home, please leave a message with your name and phone number.)

Meet some new friends, get some good exercise, improve our community and show the next generation the value of seniors!
